Property Description

There is a city called 'The Best Climate' in Costa Rica. It is a city where the Costa Rican culture is still preserved, a place characterized by its humble, honest and friendly inhabitants. This place is only 40 minutes from the Airport and San Jose Downtown. And 1 hour drive to the most beautiful beaches. Do you know Atenas, come and visit us! This house was finished in July 2023, so the person who buys it will literally open this beautiful house built with concrete and precious wood on a 1300m2 plot. The interesting thing about this property is that from the common area you can admire the beautiful landscape while enjoying a barbecue, reading a book or just relaxing with the sounds of nature. A few minutes from the property you can also visit the farmer's market. The property has a parking space under the roof. 2 spacious bedrooms and 2 bathrooms. An open kitchen. And at a price of just \$264,500 it's yours.
