Property Description

This heavenly villa offers the quintessential Costa Rica experience for those who love cooler temperatures, abundant wildlife, and big views. Whether lounging in the infinity pool or birdwatching from the rancho, this rare gem inspires serenity. Nestled 825 feet above the beaches of Uvita, this 1,205 sq. ft. home sits on a mountain ridgeline and is oriented toward the spectacular southwest-facing ocean and valley views. Built in 2015, this home was meticulously constructed with a concrete block and rebar foundation and walls. From the peak of the roof to septic system, every detail from the well-respected builder says "quality". For example, the vaulted red cedar ceiling features a special cupola design to maximize ventilation (think- cool inside even in the heat of summer). The single-level floorplan offers two bedrooms and two full bathrooms separated by the great room which includes the kitchen, dining area, and lounge area.
