Property Description

"Located in the heart of Monteverde's cloud forest, this fully remodeled (2025) luxury eco-home offers a rare combination of privacy, usability, and lifestyle versatility. Set on almost 1 hectare (2.4 acres) of completely flat and usable land, the property enjoys panoramic views of the surrounding forest, valley, and the Gulf of Nicoya—an exceptional feature in an area known for steep terrain. Designed as a multifunctional family estate, the home seamlessly blends natural architecture with modern comfort. Built primarily from wood and complemented by stone elements, the property provides a warm, organic atmosphere while being thoughtfully adapted to the local climate, including multiple fireplaces and natural ventilation. Large windows throughout the home frame the landscape like a living canvas, allowing for constant connection with nature and abundant natural light. Wildlife is part of everyday life, with frequent sightings of toucans, monkeys, and a wide variety of bird species.
