Property Description

If you've ever dreamed of living off the grid, this is your chance to make it a reality in the stunning Costa Ballena region of Costa Rica's South Pacific. This property is located just a 15-minute drive from Uvita, nestled in the mountains at an elevation of 885 feet (270 m) above sea level. It offers the perfect balance—above the heat of Uvita and below the cloud line, ensuring comfortable living year-round. One of the few parcels in today's market that is truly ready to build, this property comes with a spring water concession and option for electricity available at the property line if you want to go on grid. At the top of the property, you'll find a prepared building site, ready for you to design and construct your dream home. The gentle slopes below are ideal for additional building sites or cultivating gardens. Before reaching the forest, there is nearly half an acre of flat land, perfectly suited for planting or further construction.
