Property Description

Perched on the south side of the Guerra Hills near the mouth of the famed Sierpe River, gateway to one of Earths most intense biological zones, this extensive 166.4-hectare (411.1-acre) tract includes a diversity of topographies and habitats perfect for an ecologically minded investor looking for a grand adventure. Off the beaten track and beyond the grid, this pristine environmental treasure includes sections of virgin rain forest, mature secondary forest, and rich mangrove wetlands, rising from sea level to an elevation of 200 meters (656.1 feet). Accessible most easily by boat, few places in the world are more ideal for ecological or scientific tourism, or the ultimate getaway estate. From the propertys heights you can watch migrating whales pass by the ever-changing vista of the Sierpe River flowing into the sea, or wonder at the grandeur of a full-blown night sky undisturbed by electric light haze.
