Property Description

Hermosa Springs has pristine natural beauty and provides access to dozens of spectacular ocean views, untouched jungle, teak trees and pasture lands. The property defies description by mere words and is the essence of what has made Costa Rica: * Costa Rica hosts one of the most diverse biological ecosystems on the planet. * Abundant wildlife and undiscovered natural treasures offer visionaries a unique opportunity to own a magical preserve that is both isolated and protected from the outside world, yet amazingly accessible. * Hermosa Springs provides an ideal environment for development of an unparalleled ecological community. * Pure water, tropical rainforest, flora and fauna at unimaginable densities and beauty beyond words -an opportunity like no other. Hermosa Springs Size: 315 hectares (778 acres) Price: \$2.6 million 100 acres are planted with valuable teak in 1998. The balance consists of a natural forest, streams, and pasture land.
