Property Type: Land • Lot Size: 575864 Square metres •

- Status: Available

Property Description

This untouched 142-acre property is ready to be transformed into a private development or preserved as an extraordinary nature retreat. With 17.5 acres of cleared, buildable land and a prime location offering access to the main highway in just 15 minutes via a paved road, the property combines convenience with exceptional natural surroundings. Opportunities of this scale are increasingly rare within the Costa Rica real estate market, making it an attractive option for developers, investors, or buyers seeking a legacy property with significant long-term potential. Located only 30 40 minutes from Marina Pez Vela in Quepos, this property is already segregated into 10 separate lots and is ready for development. It includes nine smaller lots ranging from 5,000 to 10,000 square meters and one expansive 50-hectare parcel originally designed as a nature reserve. A small river runs along one of the property's borders with year-round water flow.
