Property Type: Land • Lot Size: 120000 Square metres •

- Status: Available

Property Description

120 Hectares Adjacent to the Children's Eternal Rainforest, Costa Rica A rare opportunity to acquire 120 hectares (296 acres) of primary and mature secondary forest within one of Costa Rica's most important conservation landscapes. Directly connected to the Children's Eternal Rainforest (Bosque Eterno de los Niños), this remarkable property forms part of a vital ecological corridor supporting biodiversity, watershed protection, and wildlife habitat in the Monteverde region. For more than 60 years, the same family has protected and preserved this land without intensive development or commercial exploitation, allowing its forests, rivers, waterfalls, and ecosystems to flourish naturally. Today, they seek a like-minded steward who shares their commitment to conservation, preservation, and responsible land management. Monteverde: A Global Conservation Legacy Few places in the world are as closely associated with conservation, environmental education, and scientific research as Monteverde.
