Property Description

Discover a rare opportunity to own 4 hectares (9.9 acres) of titled tropical land near Golfo Dulce on Costa Rica's Osa Peninsula, one of the most biodiverse regions in the world. Set within an extraordinary natural environment dominated by rainforest and protected land, this property combines privacy, abundant wildlife, existing infrastructure and development potential. Monkeys, scarlet macaws, tropical birds and other native wildlife are part of the surrounding ecosystem, creating an exceptional setting for a private nature estate, eco-retreat, boutique eco-lodge, wellness retreat or vacation rental project. One of the property's greatest advantages is its location within an area where much of the surrounding land is protected, helping preserve the rainforest, biodiversity and sense of seclusion. Developable private land in this setting is increasingly rare. The property is located approximately 5 minutes from the beaches of Golfo Dulce, with convenient access to La Palma, Chacarita, Puerto Jiménez and the natural attractions of the Osa Peninsula, including Corcovado National Park and Matapalo.
