

Land For Sale

 Puntarenas

\$230,000

Reference: 1075440233

Property Type: Land • Lot Size: 5750 Square metres •

- Status: Available

Property Description

We agree that Quepos Manuel Antonio is the best destination in Costa Rica to buy a house or make real estate investments, but there are also other areas with great potential on the south side in the limit part of the canton. Due to its location and price, this property has very special characteristics for which it is worth acquiring, the first thing to take into account is that it is located a few minutes from the fastest growing beach in the last 5 years, we are talking about Playa Linda where currently many dealers are waiting to start their developments. Also closer is Guapil beach but access is not very easy and we will have to wait a while for the general public to be enabled. Also very close are the hot springs of Hatillo, a place with a lot of nature where you can enjoy the warm waters next to the river. This property has many fruit trees such as Mango, avocado, Coconut, Carambola, Guanabana, Guava, lemons among others.
