- Jungle Views

Property Description

Luxurious resort located near Dominical on the central Pacific coast of Costa Rica. This 10-acre resort is uniquely located on a mountain ridgeline that provides the perfect ocean view looking west, and a spectacular mountain and valley view to the east. At 1500 feet above sea level, this micro-climate has the ideal temperature with a light breeze. It is easily accessible, only 6 km from the main coastal highway, on a well-maintained gravel road, however, the resort is fully immersed in nature without any distracting noise from the outside world. The property is adjacent to hundreds of acres of undeveloped primary rainforest, which is part of an uninterrupted natural wildlife corridor. Even with the abundance of tropical animals and birds, there are unique species, like the spider monkeys that often pass through the resort daily. The resort developer had a dream of creating a fully sustainable, environmentally integrated eco-resort and retreat.
