Property Description

If you are looking for a home that has curves and nooks instead of squares and blocks, finished with handcrafted woodwork and big views, look at this one. Pull into the garage and walk up the stairs onto one of the front porches and you'll stop right there for a few moments to look out over the Pacific Ocean clear up to Manuel Antonio. Then go on inside and you'll be in a kitchen/dining/living area that has creative touches throughout. There is an old world look to it all, with the arched doors, celtic style windows high on the walls, patterned ceiling tiles, and curved wooden staircase. The data says 3- bedroom. Actually it's currently 2 BR, but I put 3 because the second bedroom could so easily be divided into two with a shared bath and plenty of room for furnishings. They would both have access to a porch and the same ocean view enjoyed from the rest of the house. There is a pool long enough for lap swimming, and there are two more spaces lower down on the property where you could build separate cabins or villas to rent.
